

Earthly equivalents of the Thennla people

One difficulty with Thennla seems to be that some people cannot visualize the concrete peoples and their countries so well.

It is usually helpful to use historical equivalents, because the best [historical] source books are in the city library.

Those who need specific information for their Thennla can look up the following cultures and epochs:

Archipelagos: Greek Late Bronze Age, i.e. Helladic period [1190 - 1060 B.C.] and the Aegean culture in the period 12th - 8th century B.C.

Assabia: Pre-Islamic Arabia [certainly the focus is on the 3rd century B.C. to the 3rd century A.D.], Pre-Islamic Central Asia [5th century B.C. to the Sassanid Empire of the 3rd century A.D.]. The Oriental culture and aesthetics from "Thousand and One Nights" play an important role.

Jekkarenian theocracy: none [1].

Korantia: Ancient Greece in the 4th century B.C. [late classical period] and Ancient Greece around 330 - 30 B.C. [Hellenistic period]. In addition a little bit of Etruscan and ancient Italy [both surely around 600 B.C.].

Taskan Empire: : Parthian Empire of the Arsakids [3rd century B.C. - 3rd century A.D.] and Hellenistic Era [330 - 30 B.C.] with emphasis on the Late Hellenistic Era, when Rome manifested itself and Ptolemaic Egypt was conquered.

The Thennalt:: Archaic Greece/Italy/Anatolia [8th century - 5th century B.C.] with emphasis on the Greek ethnicity rather than the Greek polis culture. Additionally a little bit Thracian [probably the whole historical period from 7th century B.C. to 4th century A.D.].

It should be noted that Jonathan Drake probably refers to the Thennalt of the Thennla source material, i.e. the Thennalt ethnic group living around and in the four core civilizations. However, the Thennalt have mainly settled in the whole north of the Taygus continent and have possibly migrated as far as East Thurina. These Thennalt have possibly rather something in common with the Germanic tribes of Central Europe and Southern Scandinavia. [2nd century BC - 5th century AD]. Of particular interest here are certainly the tribes of the Lugians and Vandals as well as the Goths with emphasis on the Terwings, Visigoths and Visigoths, i.e. the period around the 3rd - 4th century AD.

Basically Thennla is a fantastic background, and everybody can put his own ideas and even whole settings into the world [only 1 of 6 continents is defined]. But for game groups who like to orientate themselves by historical peoples and historical sources, the above references might be useful.

Source:

"Here's a quick summary of the most often encountered ones:

Korantia - Late Classical/Hellenistic Greek, smattering of Etruscan, Italic etc

Taskan Empire - Hellenistic/Parthian

Thennalts - Archaic Greece/Italy/Anatolia, Greek 'ethne' rather than 'polis' cultures; a little bit of

Thracian

Archipelago Goose - Late Bronze Age (LHIIIC)/ Dark Age Aegean

Assabia, Djesmirket etc - pre-Islamic middle east; central Asia; Arabian Nights

Uxmal - Meso American (very loosely, more of a visual than anything)";

author Jonathan Drake]

1] "There's no real historical reference point I'm aware of for a matriarchal (rather than matrilineal) society. So the underlying assumption is that it's a state that depends on oppression and secrecy to maintain the status quo because it is so different to everywhere else - and it is always an intriguing, exotic place to outsiders nonetheless. [Jonathan Drake]

The Taskan Empire and its realword references

I am not a historian and have only paraphrased the author's guidelines and classified them historically more precisely, but when I look at the wiki article on the Parthian Empire:

»The Parthian Empire of the Arsakids was the dominant power of the first pre-Christian and the first and second century A.D. in Iran and Mesopotamia.«

Fits, referring to the historical classification of the Thennla world and the geographical section of the earth's history.

»...] built up an empire which, at the time of its greatest expansion, also encompassed large parts of Mesopotamia, southwestern Central Asia and some adjacent areas, including some Greek poles.«

Fits when you look at which Thennla countries with their earthly equivalents are included in the Taskan Empire.

»Arsakes I, the founder of the Parthian Empire and also some elements of the dynastic history remind a little bit of the Taskan emperor.«

The geographical and power-political position of the Parthian Empire on the Caspian Sea is similar to that of the Taskan Empire on the Gulf of Taskay.

»The territory conquered by the Parthians had been mostly only superficially Hellenized. Nevertheless, there were regions where a strong Greek influence was noticeable, especially in some cities (Poleis).«

Corresponds to the "Hellenization" of the Taskan Empire, which only weakly and in a reduced form extended its political philosophy and culture to the urban centers.

»The Parthians soon adopted Greek minting, and Greek was for a long time one of the administrative languages.«

Fits, since the Taskan Empire "owns" the Koranic culture in the first step and built on it. For example, although there is a Taskan currency, the Koranic coin is still the standard measure.

»In general, Iranian and Greek-seleucid traditions were often combined in the Parthian Empire.«

The Taskan Empire is a mixture of Hellenism and Mesopotamian [Iranian] roots.

The Taskan Empire is a mixture of Hellenism and Mesopotamian [Iranian] roots *»[...] ultimately due to the invasion of steppe peoples from Central Asia, who posed a constant threat; the Parthians, too, were later to become involved in sometimes heavy defensive struggles on this border.«*

The Taskan Empire is constantly threatened by the steppe peoples of the Sheng and must fence defensive fights; particularly explosive for 20 years the defense fight in the northern area.

»This was a decisive step, because the rich country between the Euphrates and Tigris rivers provided the crown in particular with considerable means of power.«

Mesopotamia is the influx country of the Beschor in the Taskanian Empire. The Beschor with its border is similar to the Euphrates border of the Parthians.

In these Parthian wars, the same pattern often appeared: if the offensive (as probably 161) was launched by the Arsakids, a Parthian advance followed, sometimes deep into Syria and Armenia

The Taskan Empire fights on the Assabian front in areas reminiscent of Syria and Armenia.

»But also the defensive fights against the steppe peoples (Saks, Kushan) on the northeastern border were a constant burden for the empire, whose king had only relatively small income possibilities - such as customs duties.«

Kushan [earthly], Khitan steppe [Thennla], which is located in the northeast of the Taskan Empire.

»The Silk Road was "opened" in 115 BC: A delegation of the Chinese emperor Han Wudi paid their respects.«

The Silk Road of the Taskan Empire leads to the Sultanate of Jelhai in Assabia.

»The military power of the Parthians was based on the massive use of mounted archers (see also Parthian Maneuver) and their heavy cavalry, the Kataphraktoi and Klibanophoroi. However, no detailed accounts of Parthian military life have been preserved.«

The cataphraktoi of the Taskan Empire are the Eskar, the subjugated steppe barbarians.
The Furies of the Emperor resemble the Klibanophoroi of the Parthians.

»Domestically, the Parthian Empire was a feudal state in which dynastic sub-dominions (e.g., Armenia, Charakene, Elymais, Atropatene Media) developed. The central government was apparently only quite weak (despite a royal council), and the power of the great noble houses was considerable, even at the king's court; the eternal struggles between king and nobility may also have been one reason for the ultimate decline of the Parthian Empire.«

Corresponds exactly to the Taskan Empire. Especially the intrigues between nobles at court are fitting.

Not for nothing the original supplement was called "Age of Treason".

The Parthian Great King corresponds to the Emperor.

»Culturally and religiously the Parthians showed a great tolerance, even though the kings showed a special closeness to Zoroastrianism, and were especially open-minded towards the Hellenistic culture.«

Similar to the Taskan Empire, which has a complex state pantheon but also many included foreign cults. In addition, foreign gods are appeased and put to sleep [inclusion] instead of destroyed [exclusion].

The whole area of the economy of the Parthian Empire fits very well with the Taskanian Empire. I also see references in the field of art, especially since the Parthians were oriented towards the Greeks and the Near and Middle Asia.

These were the spontaneous similarities, if you put the Parthian description next to the Taskan Empire.

In the above-mentioned Taskan equivalent of Late Hellenism, there are similarities between the emperor [or even his viceroy] and Alexander the Great as well as Macedonia.

The geographical location of Macedonia is also similar to the Taskan Empire, so the Hellenistic equivalent of the empire can be found in Macedonia.

The Black Sea would have similarities with the Gulf of Taskay. Also the empire of the Hellenes reached as far as India. The Tascans are not yet that far, but the Indian equivalent Thennlas is on the southeastern periphery. The conquered "Orient" is with the annexed Assabian nations.

The Taskan conquest of the Korasuhn desert and the surrounding desert states is similar to the campaign of the Hellenes against the Egyptian Ptolemy Empire.
